Objective

I have completed MERN Stack Web Development. I wish to use my frontend development experience for an entry level position to Pursue a Challenging career and be part of a progressive organization that gives Scope to enhance my knowledge. As a web developer I know my responsibilities well, I understand how my job will automate any type of business model. Before going to the logical part I try to understand how customer business is going and what are customer's problems which I can solve with the help of my code.

Education

MERN Stack Web Development	2020-21(with grade A)
Bachelor in Engineering (RTM Nagpur University),MH	2015-20(with 7.8 CGPA)

Technical Skills

- Web Development(Html, Css , JavaScript , Bootstrap-4 , JQuery , ReactJs , NextJs, NodeJs, MongoDB, AWS Cloud, GIT, Docker, Redis)
- Database(MongoDB)
- Programming language (C , C++(basic))
- Coursework(Object-Oriented Programming, DBMS,Operating System, Data Structure)

Soft Skills

- I love W3Schools
- Open Source Contributions
- Product Design
- Cost Effective

Projects

❏ Project Title: HOLIDIFY

Platform Used: ReactJs, NextJs, NodeJs, MongoDB, AWS

Role and Responsibilities:

Holidify is a Travel and Tours booking website.

- Developed the user interface for the admin panel, ensuring a user-friendly and responsive design.
- Implemented RESTful APIs to support backend functionality, optimizing data retrieval processes.
- Ensured the scalability of the application by optimizing MongoDB queries and AWS services.
- Collaborated closely with product managers to align development with business objectives.
- Enhanced performance using Next.js server-side rendering (SSR) to improve page load times.

- Managed security best practices, including authentication and authorization protocol

Website: <https://www.holidify.com/>

Project Title: TGIFINDIA

Platform Used: ReactJs, NextJs, NodeJs, MongoDB, AWS

Role and Responsibilities:

TgifIndia is a casual dining and bar restaurant category.

- Designed and built the user interface, ensuring mobile-first design principles for responsive functionality.
- Created and integrated RESTful APIs to manage core functionality like booking and event management.
- Implemented AWS S3 for media storage, optimizing image and file handling for faster load times.
- Collaborated with the backend team to integrate payment gateways and third-party services.
- Performed unit and integration testing to ensure reliable code quality.
- Improved site performance through code-splitting and lazy loading in React.

Website: <https://www.tgifindia.com/>

□ **Project Title: MCC.edu**

Platform Used: ReactJs, NextJs, NodeJs, MongoDB, AWS

Role and Responsibilities:

Institution of excellence transforming lives through education with a commitment to service.

- Handled the user interface design and development for the admin panel, ensuring intuitive user experience.
- Developed RESTful APIs to enhance interaction between the front-end and back-end.
- Integrated MongoDB Atlas for database management and optimized the data models for scalability.
- Implemented SEO best practices within the Next.js structure to enhance organic search rankings.
- Coordinated with the design team to improve the visual aesthetics of the user interface.
- Developed caching mechanisms using Redis to improve backend performance and reduce server load.

Website: <https://mcc.edu.in/>

□ **Project Title: MAYA ARCHITECTS**

Platform Used: ReactJs, NextJs, NodeJs, MongoDB, AWS

Role and Responsibilities:

MayaArchitect offers Architectural Consultancy, Interior Design and Project Management Consultancies.

- Created the admin panel's user interface with an emphasis on usability and accessibility.
- Built RESTful APIs to support various backend processes, including project management and resource allocation.
- Integrated AWS Lambda for serverless functions, reducing infrastructure complexity and cost.
- Ensured cross-browser compatibility for the front-end, optimizing it for various devices and resolutions.
- Developed a real-time data sync feature between the front-end and back-end, enhancing user experience.
- Utilized Next.js dynamic routing to create seamless page transitions.

Website: <https://www.mayaarchitects.com/>

❑ Project Title: CHENNAITAXISERVICE

Platform Used: ReactJs, NextJs, NodeJs, MongoDB, AWS

Role and Responsibilities:

Chennai taxi service for reliability, quality and safety.

- Designed and implemented the admin panel UI with a focus on reducing complexity for non- technical users.
- Developed necessary RESTful APIs to integrate front-end with back-end services, such as inventory management.
- Implemented AWS CloudFront to optimize content delivery and improve site performance globally.
- Enhanced the front-end's responsiveness and speed using Tailwind CSS for faster UI development.
- Set up CI/CD pipelines with AWS CodePipeline for automated deployment and testing.
- Performed performance audits and refactored code to improve the site's Lighthouse scores.

Trainee

From WAP INSTITUTE (Bihar) (<https://wapinstitute.com>):

An international iso certified highly configured computer science courses institute stands for windows application & programming institute. I am trained in **Web Development** , The training was of twelve months in which I learned theoretical as well as practical knowledge. And I developed many projects like Text editor software,video streaming , file sharing, Signup/login,Ecom,Ebook , Crud Application and many more website templates. I will learn various languages Like Html , Css , JavaScript , Bootstrap , JQuery , Sql , MySql , ReactJs .

Licenses & Certifications

MERN Stack Web Development -Wap Institute (www.wapinstitute.com)

Reg/No : XVP8WA4AW

Month : 12 months

Experience

Company name : Techsunset (<https://www.techsunset.com>)

(JUN-2021 to MAR-2025)

3.9 Years

Description: Responsible for building user interfaces and APIs for clients and companies.

Personal profile

Date of Birth: 11th May, 1997

S/O: late Ashokrao Burange

Nationality: Indian
